

# Colorful Paper Plate Flowers

What you need:

-  4 Paper Plates
-  Scissors
-  Glue/ Stapler
-  Markers/ paint or crayons

1. First, cut four different size flowers out of the paper plates. (Each flower consists of 4 paper plates.) You can create different flowers by cutting different shapes. You can draw your shapes on the back if it's easier for you to follow.

2. Then you'll want to curl each end of your petals using a marker or pencil. Then stack your flowers with the largest in the back and smallest in the front.

3. Next you can attach all of the plates using a stapler or glue, whichever you have.

4. Then you can start to decorate! I used watercolor but you can use markers or crayons. Be creative and add as much detail as you'd like.

5. Once your flower is dry or you're done decorating, you can "fluff" your flower to make it look fuller. Don't forget to share your creations with us on Facebook!
